Advanced Ecology. Monitoring, diagnostics, prognosis

Cuprins

Summary

Preface

Abbreviations and acronyms

Chapter 1. Global ecology problems

1.1 Global dynamics of the ecosystems

1.2 Present global ecodynamics

1.3 Consumption society: ecological restrictions

1.4 Fresh water problems

1.5 Energy production and consumption

1.6 Global nature-society system

1.7 Globalization and sustainable development

1.8. Global change: priorities

Chapter 2. Biocomplexity as indicator of the ecosystem state

2.1 Ecological safety

2.2 Biocomplexity

2.3 Biocomplexity problem in global ecoinformatics

2.4 Survivability and biocomplexity

Chapter 3. Global ecological investigations

3.1 Conceptual aspects

3.2. General description of the global model

3.3 Encouraging view

3.4 Perspectives and hopefulness

Chapter 4. Natural disasters

4.1 History of natural catastrophic events

4.2 Earthquakes

4.3 Floods

4.4 Dangerous atmospheric events

4.5 Volcanic eruptions

4.6 Dangerous events on the earth

4.7 Heat and drought

4.8 Wildfires

4.9 Acid rains

4.10 Forest fires

4.11 An adaptive information technology for the operation diagnostics of the ocean-atmosphere system

Chapter 5. Problems of the inland water ecosystems

5.1 The Aral-Caspian aquageosystem

5.2 The Okhotsk Sea ecosystem

5.3 Lagoons

5.4 Information-modeling instrumental system for the water resource diagnostics

Chapter 6. World Ocean ecosystems

6.1 Ocean ecosystem dynamics

6.2 Upwelling ecosystem

6.3 The Peruvian Current ecosystem

6.4 Sea zones of oil and gas extraction

6.5 Ecological monitoring of the sea surface of oil and gas extraction zones

6.6 Estimation of the oil hydrocarbon pollution parameters

6.7 Expert system for the identification of pollutant spills on the water surface

6.8 The gas extraction zone in the South-China Sea

6.9 Pollutant spreading in the arctic basin ecosystem

Chapter 7. Land ecosystems and global ecodynamics

7.1 Global dynamics of land ecosystems

7.2 Modelling the forest ecosystems

7.3 The energy fluxes in the atmosphere-plant-soil system

7.4 Coniferous forests

7.5 Succession in the tundra-taiga system

7.6 Evolutionary modeling technology
