## **Introduction to the construction engineering of seismic isolated buildings**

### **Cuprins**

1. Foreword
2. Preface
3. Introduction
4. Principles of seismic isolated buildings
5. Special considerations for seismic isolated buildings
5. Definitions according to ISO 23618-2021(E)
6. Construction of seismic isolated structures
7. Types of seismic isolation devices
  - 7.1 Seismic isolators (ISO 23618-2021(E))
  - 7.2 Dampers 43
8. Simple analysis of a rc building with seismic isolation using stera 3D
9. Choosing the seismic isolation devices
10. Lifting equipment selection
  - 10.1 Establishing of the approximate erection radius
  - 10.2 Choosing the crane
  - 10.3 Choosing the forklift
11. Inspection and replacement of a seismic isolation device
12. References
13. Annex 1: Student project data

14. Annex 2: Example of an erection plan of isolators with a crane
