Fourier Analysis and Integral Transformations with Applications in Engineering

Chapter 1. Fourier Analysis

- 1.1 The pre-Hilbert space R
- 1.2 Generalized Fourier Series
- 1.3 Trigonometric Fourier Series
- 1.4 Convergence of the Fourier Series
- 1.5 Fourier Series of Even and Odd Functions
- 1.6 Complex Fourier Series
- 1.7 Signal Fourier Series Representation
- 1.8 Exercises
- 1.9 MATLAB Applications
- 1.10 Maple Applications

Chapter 2. Fourier Transform

- 2.1 Definition
- 2.2 Properties of the Fourier Transform
- 2.3 The Inversion Formula
- 2.4 Fourier Integral
- 2.5 Discrete Fourier Transform (DFT)
- 2.6 Fast Fourier Transform (FFT)
- 2.7 Exercises
- 2.8 MATLAB Applications
- 2.9 Maple Applications

Chapter 3. Laplace Transform

- 3.1 Definition
- 3.2 Properties of the Laplace Transform
- 3.3 Inverse Laplace Transform
- 3.4 Applications of the Laplace Transform
- 3.5 Exercises
- 3.6 MATLAB Applications
- 3.7 Maple Applications

Chapter 4. Z Transform

- 4.1 Definition
- 4.2 Properties of the Z Transform
- 4.3 Determination of the Original
- 4.4 Applications of the Z Transform
- 4.5 Exercises
- 4.6 MATLAB Applications
- 4.7 Maple Applications

A Tables of Integral Transforms

A.1 Fourier Transform

A.2 Cosine Fourier Transform

A.3 Sine Fourier Transform

A.4 Laplace Transform

A.5 Z Transform

Bibliography
